

# You Are Not Alone

## We Can Help

Our mission is to provide a healing environment where patients feel safe and well cared for by staff who have specialized training in the care of an aging population.

### Comprehensive Evaluation

An individualized treatment plan is designed at the time of admission. Every care plan is supported by a team of physicians, nurse practitioners and professional staff.

### Psychiatric Care

At Sana we provide an intimate, supportive environment for our patients to heal. We specialize in meeting the emotional, behavioral and physical needs of all our patients.

### Payment Options

We accept Medicare and commercial insurance plans. Call us to review your insurance coverage and to learn about other payment options.

### 24-hour Care

We are dedicated to caring for our patients in a sensitive but structured environment all day, every-day. We accept admissions 24 hours a day, seven days a week.

## Personalized Treatment

Sana Behavioral Hospital focuses on providing medical and psychiatric care to adults age 55 and older. Our patients receive care in a modern 24-bed secured hospital that treats acute psychiatric issues. Our integrated treatment program of psychiatry, physical medicine and therapy begins after a comprehensive evaluation.

## Sound Mind. Sound Body.
